November 2001

Atrium Professional Series Doors

Our professional series doors feature aluminum clad pre-painted exteriors that provide durability and strength against the elements. Interiors are unfinished and ready for the paint of your choosing.

Doors are pre-bored for your choice of lock and dead bolt.

Anodized aluminum sills with integral weep system and thermal breaks are also standard. Thermal breaks reduce conductive heat loss.

One lite is standard. Removable interior wood grilles, internal aluminum bars or Atrium Classic Lite (ACL) provides a true divided appearance.

Exceptional Performance

On time shipments: We shipped 92.7% of our orders on time during the month of September.
